

One-Pair Outdoor Distribution Point Units

Key Features

- Covers have a stainless bead chain affixed to the mounting brackets to prevent cover loss during servicing
- Brass terminals are corrosion-resistant for long life

Description

Outdoor distribution point units feature either aluminum or plastic bases, brass terminals, and drawn aluminum or plastic covers. The mounting brackets are made of formed aluminum.

Aluminum covers have a stainless bead chain affixed to the mounting brackets to prevent cover loss during servicing.

Application

1-pair outdoor distribution point units are used for open wire circuits and long drop wire runs. The 5500 series are for use on 1-pair open wire, RDW (Rural Drop Wire), or figure 8 service drop applications.
